**READING**

- A) Coal tar is black and sticky. For a long time, people thought of it as a nuisance. This oily, smelling substance blocked up the pipes, so gas makers and coke makers washed it out and tried to get rid of it. Some of it was sold for roofing but most of it was wasted. But this evil-smelling nuisance has been found to be one of the most useful raw materials in the world. From it, the chemist is able to make almost anything he wishes from medicines to explosives, from dyes to disinfectants. Not all these things are made from coal tar itself. Only about a dozen simple products come from it. But from these, the chemist is able to make thousands of new substances. Some of the most important things made from coal tar are dyes. A whole rainbow of colors is made from coal tar. More than nine hundred different coal tar dyes are in common use. These dyes not only give fine colors to our clothes, ribbons, shoes, and hats but also give pleasing colors to many of our sweets and drinks. Some of the coal tar dyes serve another purpose besides that of giving color, they are used to heal wounds. Many important medicines are made from coal tar. Carboic acid is one such. Another is used by a dentist when he pulls out a tooth. It deadens the nerves in the gum so that no pain is felt.

On the basis of your reading of the passage, answer the following questions:

1. Complete the given table. 1

**B) Saeeda's mother had been ailing for a long time — fever, cough, body-ache, painful joints, and whatnot. Treated by a variety of physicians for weeks, she often showed signs of improvement but soon relapsed into her old, sick self, one complaint substituted by another. Though weak and colorless, she was forbidden normal food and was under strict orders to remain perpetually confined to her small, dingy room with doors and windows fastened, deprived of sunshine and fresh air. When she became critical, her relatives and neighbours persuaded her to consult a specialist even though his fee was likely to be high. Life is more precious than money, they said. Saeeda's mother was poor but she heeded their advice and sold a few trinkets to pay the doctor's fee and the cost of medicine. The doctor came in a few days and examined her and prescribed effective but costly medicine. To the question as to what she should eat he said, "Anything you wish to eat chapati, vegetables, milk, fruits, etc. In addition to all this," he added emphatically, "leave this dark hovel and occupy a bigger room with doors and windows open. Sit in the sun every morning from eight to nine. Sunshine and fresh air," he concluded, "are more important than medicine."**

- (ख) सजगता के साथ निर्णय करने वाले
- (ग) सजगता के साथ चुनाव करने वाले
- (घ) सजगता के साथ अपने लक्ष्य चुनने वाले

(iv) हमें अपने मित्रों के चुनाव में भी सावधानी क्यों बरतनी चाहिए?

- (क) मित्र का चुनाव हमारी सफलता और असफलता के लिए ज़िम्मेदार होता है ।
- (ख) मित्र के चुनाव से हमारे चरित्र का पता चलता है।
- (ग) मित्र के चुनाव से हमारे सम्मान और प्रतिष्ठा पर प्रभाव पड़ता है ।
- (घ) मित्र के चुनाव से हम सही राह पर चलते हैं

(v) सच्चा मित्र और कुमित्र हमारे जीवन को किस प्रकार प्रभावित करता है?

- (क) सच्चा मित्र हमसे कुछ लेता नहीं है कुछ देता ही है।
- (ख) सच्चा मित्र संकट में साथ देता है । कुमित्र संकट के समय साथ छोड़ देता है।
- (ग) सच्चा मित्र विश्वसनीय कुमित्र अविश्वसनीय होता है।
- (घ) सच्चा मित्र सन्मार्ग पर ले जाता है कुमित्र पतन के गर्त में धकेल देता है ।

प्रश्न-2 नीचे दिए गए अपठित गद्यांश को ध्यानपूर्वक पढ़कर उचित विकल्प चुनिए (5x1=5)

मनुष्य एक सामाजिक प्राणी है। वह सभी कार्य अपने आप नहीं कर सकता । वह अनेक कार्यों में दूसरों की सहायता लेता है तो उसे भी दूसरों की मदद करनी पड़ती है । सहायता के इस प्रकार के आदान-प्रदान के अभाव में समाज जीवित नहीं रह सकता । समाज में रहकर व्यक्ति अनेक लोगों के संपर्क में आता है । उनमें से कुछ लोग अच्छे होते हैं , तो कुछ बुरे । मनुष्य पर सभी प्रकार के लोगों का थोड़ा या बहुत प्रभाव अवश्य पड़ता है । पर यह बात स्पष्ट है कि बुरे लोगों की संगति में रहने पर उस पर बुरा तथा अच्छे व्यक्ति के संपर्क में आने का अच्छा प्रभाव पड़ता है। इसलिए किसी ने ठीक ही कहा है , 'खरबूजे को

**HALF YEARLY EXAMINATION**  
**SAMPLE PAPER (2023-24)**  
**CLASS-VI**  
**MATHEMATICS**

Time allowed: 3 hours

Maximum Marks: 80

**General instructions:**

1. This question paper has sections A-E.
2. Section A: (Q1-Q12) has 12 MCQs carrying 1 mark each.
3. Section B: (Q13-Q20) has 8 questions carrying 2 marks each.
4. Section C: (Q21-Q28) has 8 questions carrying 3 marks each.
5. Section D: (Q29-Q32) has 4 questions carrying 5 marks each.
6. Section E: (Q33-Q34) has two case-based integrated units of assessment (4 marks each) with sub-parts of values of 1,1 and 2 marks each respectively.
7. All questions are compulsory. However, an internal choice has been provided in the 2 marks questions of Section E and internal choice of 2 questions in Sections B, C and D.
8. Draw neat figures wherever required.

**SECTION A**

**Q1.**  $6 \times (7 + 3) = (6 \times 7) + (6 \times 3)$ . This statement shows that multiplication of whole numbers is \_\_\_\_\_ over addition.

- a) distributive                      b) commutative                      c) associative                      d) identity

**Q2.** Shikha is rowing a boat in the north- east direction. In which direction will she row if she turns it through a straight angle?

- a) North- west                      b) South-West                      c) South                      d) West

**Q3.** Number of lines passing through five points such that no three of them are collinear are:

- a) 10                      b) 5                      c) 20                      d) 8

**Q4.** What is the value of  $(-10)^3 \div (-10)$ ?

- a) 10                      b) -10                      c) 100                      d) -100

**Q5.** How many pairs of linear pairs in the given figure?

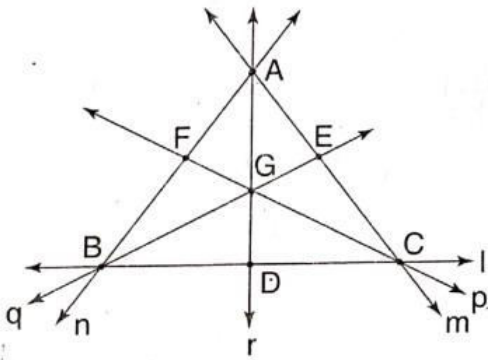

- a) 4                      b) 8                      c) 10                      d) 6

**Q6.** The pair of integers whose sum is -5:

- a) 1, -4                      b) -1, 6                      c) -3, -2                      d) 5, 0

**Q15.** In the given figure, name:

- (a) the lines concurrent at point A
- (b) collinear points lying on the line q
- (c) two pairs of intersecting lines
- (d) a pair of perpendicular lines

**Q16.** While writing Roman Numerals, Rohan wrote 99 as IC. Point out his mistake and write the correct form. Justify your answer by giving appropriate reasons.

OR

**Q16.** A student multiplied 7236 by 65 instead of multiplying by 56. By how much was his answer greater than the correct answer? Use a suitable property of whole numbers.

**Q17.** The population of Delhi State in different census years is as given below:

Census year	1961	1971	1981	1991	2001
Population in Lakhs	30	55	70	110	150

Represent the above information with the help of a bar graph.

**Q18.** Find the value by using distributive property.

$$3845 \times 5 \times 782 + 769 \times 25 \times 218$$

**Q19.** The state government of Himachal has issued the following numbers for the cars, purchased in the month of October 2021.

- HP 20-C 1416      HP 20-C 1832      HP 20-C 1839
- HP 20-C 1297      HP 20-C 1196      HP 20-C 2000

To promote sales, the selling company has offered to pay the registration fee on behalf of the buyer of the car provided the last four digits of his/her car number are divisible by four. Which car numbers will benefit by this offer?

OR

**Q19.** Identify the value of 'y' in the number 829y7 so that the number is divisible by 11.

**Q20.** Draw a figure and label suitably in each of the following cases:

- a) line l contains points E and F but not D.
- b) lines XY and PQ intersect at M.

**SECTION C**

**Q21.** Evaluate:  $(-36) - 40 + 43 - (-29) + 18 - (-74)$

**Q22.** The temperature on a certain morning is  $-11^{\circ}\text{C}$  at 5 a. m. If the temperature drops 3 degrees at 6 a.m. and rises 5 degrees at 8 a.m. and again drops 3 degrees at 9 a.m. What is the temperature at 9am?

**Q23.** In the figure given below, transversal 'n' intersects lines 'l' and 'm'. Observe the figure and name the following angles:

- a) angle alternate to  $\angle d$
- b) angle alternate to  $\angle g$
- c) angle corresponding to  $\angle f$
- d) angle corresponding to  $\angle h$
- e) one interior angle
- f) one exterior angle

OR

**Q23.** In the given figure, lines 'l' and 'm' are intersected by a transversal 'p'. Identify the following angles.

- a) all the exterior angles
- b) two pairs of alternate interior angles
- c) two pairs of corresponding angles

**Q24.** The diagram shows the set of numbers:

2	31	17
4	15	29
1	22	18

- (a) List any two prime numbers in the given box.
- (b) Identify two numbers that are co-prime with 22.
- (c) Identify a pair of twin prime numbers.

**Q25.** Mark four points A, B, C and D on your sheet such that no three of them are collinear. Draw all the lines which join them in pairs and answer the following questions:

- a) How many such lines can be drawn?
- b) Write the names of these lines.
- c) Name the lines which are concurrent at point A.

**Q26.** In an election 23875501 votes were polled. There were three candidates in the election. Two of them got 9823823 and 11575923 votes respectively. How many votes were polled in favour of the third candidate?

**OR**

**Q26.** Priya bought 24 kg potatoes and 24 kg onions. The cost of potatoes is ₹23 per kg and the cost of onions is ₹27 per kg. Find the total cost incurred by Priya.

**Q27.** In the given figure, lines AB and CD intersect at O. If  $\angle AOC + \angle BOE = 70^\circ$  and  $\angle BOD = 40^\circ$ , find the measure of  $\angle COE$  and  $\angle BOE$ .

**Q28.** Do as directed:

a) Name any 2 transversals to the segments AC and FD.

b) How many pairs of alternate angles are there? Name them.

**SECTION D**

**Q29.** The LCM of two numbers is 12 times their HCF. The sum of the HCF and LCM is 403. If one number is 93, then find the other.

**OR**

**Q29.** Four bells toll at intervals of 4, 7, 12 and 84 seconds. The bells toll together at 5 o'clock. When will they again toll together? How many times will they do it in 28 minutes?

**Q30.** In a class test containing 25 questions, 4 marks are given for every correct answer and (2) marks are given for every wrong answer. A student attempts all questions and 20 of his answers are correct. What is the total score of a student?

Or

**Q30.** A cement company gains Rs. 12 per bag of white cement sold and gets a loss of Rs. 8 per bag of grey cement sold.

- If the company sells 3500 bags of white cement and 5000 bags of grey cement in a month, find the gain or loss.
- If the number of grey cement bags sold is 6000, how many bags of white cement should the company sell to have neither gain or loss?

**Q31.** Answer the following questions:

- A bicycle wheel makes four and a half turns. Find the number of right angles through which it turns. Give reason for your answer.
- In the adjoining figure, name the following pairs of angles.

- |                                      |   |
|--------------------------------------|---|
| i. Obtuse vertically opposite angles | iv. Unequal supplementary angles                  |
| ii. Adjacent complementary angles    | v. Adjacent angles that do not form a linear pair |
| iii. Equal supplementary angles      |   |

**Q32.** The result of a Mathematics test is as follows:

80, 90, 70, 80, 80, 60, 80, 70, 90, 65, 100, 60, 70, 60, 70, 85, 65, 70, 70, 85, 90, 60, 65, 80, 60

Make a frequency table for the above data and answer the following questions:

- What are the maximum marks obtained?
- How many students score less than 75 marks?
- How many students scored 80 marks or above?
- How many students appeared in the test?

## SECTION E

**Q33.** To help flood victims, an NGO with 343 members decided to arrange a common kitchen for them. They have been issued identity cards numbered 1 to 343. The members with identity card numbers as a multiple of 7 have been asked to bring 5kg rice each. The remaining members have been asked to bring lentil 2kg each. Based on the above information, answer the following questions:

(i) The quantity of rice collected is:

- |           |           |
|-----------|-----------|
| a) 345 kg | c) 200 kg |
| b) 245 kg | d) 102 kg |

(ii) The members with card number as first seven multiples of 7 have been assigned duly to meet the emergency needs of the children, in the flood hit area. Three members from this duty list are:

- |             |               |
|-------------|---------------|
| a) 3,10, 17 | c) 7,12,19    |
| b) 14,20,27 | d) 21, 28, 49 |

(iii) To address the health needs of the victims, the member with card number as HCF of numbers 14 and 42 has been made in charge. Find his card number.

OR

(iii) Calculate the quantity of lentils collected.

**Q34.** To encourage car owners to use public transport, the state government has come up with the following plan:

A: If a person uses public transport for a minimum of 15 days in a month, he gets Rs. 200 as award money.

B: If a person uses a personal car for a minimum of 15 days a month, Rs. 150 is deducted as fine from his account for that month.

Hari is a bank employee. He went to the office by public transport for 23 days each, in the months of November and January. Vimukh Jain, being an electricity employee, used his car for 19 days, 18 days and 16 days to go to his office, in the months of December, June and August respectively. Vimukh Jain went to his office for 17 days by public transport in the month of March.

Based on the above information, answer the following questions:

(i) The prize money earned by Hari is

- |            |            |
|------------|------------|
| a) Rs. 600 | c) Rs. 400 |
| b) Rs. 700 | d) Rs. 800 |

(ii) Money deducted from the account of Vimukh Jain is

- |            |            |
|------------|------------|
| a) Rs. 200 | c) Rs. 750 |
| b) Rs. 450 | d) Rs. 600 |

(iii) Rohan initially had a balance of Rs. 2000 in his account. He used his personal car from December to March. What will be the balance in his account by the end of March?

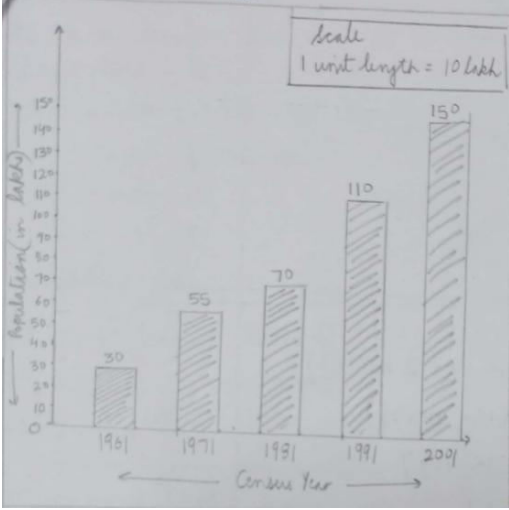

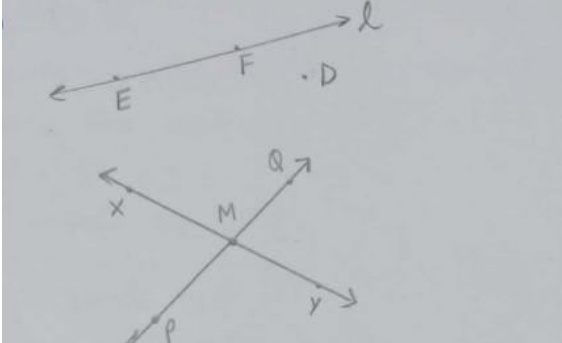

OR

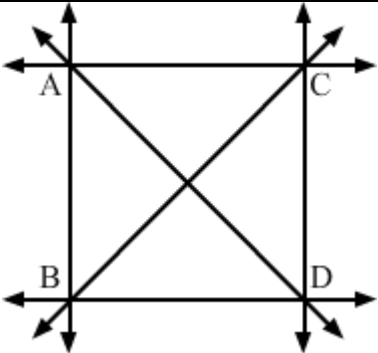

(iii) Payal used public transport to go to her office in the months of December, January and February. From March to June, she used her personal car. What amount of money did she earn/lose from December to June?

**SAMPLE PAPER TERM 1**

**TIME: 3 HOURS**

**MM: 80**

**GENERAL INSTRUCTIONS:**

- (1) This question paper consists of 39 questions in 5 Sections.
- (2) All questions are compulsory. However, an internal choice is provided in some questions. Attempt only one of these questions.
- (3) Draw diagrams with pencil and label on the right side only.
- (4) Give examples wherever possible.
- (5) Attempt the sub-parts of a question together.
- (6) Q.1-19 in Section A are Multiple Choice questions and carry 1 mark each.
- (7) Q. 20-25 in Section B are very short answer type questions and carry 2 marks
- (8) Q 26-31 in Section C are short answer type questions and carry 3 marks.
- (9) Q. 32-34 in Section D are long answer type questions and carry 5 marks.
- (10) Q.35-38 in Section E are case / source based questions and carry 4 marks

**SECTION A (1 MARK)**

**Q1. Which among the following is a Biotic component of the environment?**

- i) Sunlight      ii) soil      iii) microorganisms      iv) temperature

**Q2. It is a primary consumer**

- i) Leopard      ii) deer      iii) wild cat      iv) shark

**Q3. Grouping of materials having similar properties**

- i) Classification      ii) mixing      iii) saturation      iv) dissolution

**Q4. On increasing the temperature , the solubility of a gas**

- i) Increases      ii) decreases      iii) remains same      iv) does not change

**Q5. Sahil's mother put some naphthalene balls while packing her woollen clothes. Sahil observed that the naphthalene balls disappeared the next year when his mother took out her woollen clothes. What is the process of disappearing naphthalene balls called?**

- i) sedimentation      ii) loading      iii) sublimation      iv) crystallization

**Q6. Different components are given in the following list. Identify their method of separation and choose the correct option**

- i) tea leaves from tea      ii) butter from milk  
iii) sand from water      iv) paneer from milk

- a) (i), (ii), (iii) and (iv) by filtration
- b) (i) , (iii) and (iv) by filtration
- c) (ii) and (iv) by sedimentation
- d) (i) , (iii) and (iv) by churning

**Q7. Gatik and Mohan started walking from their house to reach their friend Ishaan's house. Gatik covered a distance of 4Km and Mohan covered a distance of 6 Km but they both took the same time. Which among the following statements is correct for the given situation?**

- i) Mohan covers a longer distance with a lower speed as compared to Gatik
- ii) Gatik covers a shorter distance with a higher speed as compared to Mohan
- iii) Mohan covers a longer distance with a higher speed as compared to Gatik
- iv) Gatik covers a longer distance with a lower speed as compared to Mohan

**Q8. An athlete needs to monitor his performance accurately on the track field. Which type of clock should he use?**

- a) analog watch
- b) stopwatch
- c) sand clock
- d) pendulum clock.

**Q9. Identify the mode of reproduction in the following organism**

- i) By giving direct birth to its young ones
- ii) By laying eggs
- iii) By splitting of vegetative parts
- iv) By dividing its cell

**Q10. An apple tree belongs to which of the categories?**

- i) Annual and Mesophyte
- ii) Perennial and Mesophyte
- c) Biennial and Mesophyte
- d) Biennial and Hydrophyte

**Q11. The tip of a shoot system tends to move towards**

- i) Gravity
- ii) Light
- iii) Heat
- iv) Sound

**Q12. Observe the relationship between the following and choose the correct option**

1) dodder	a) Provide support
2) vertebrate	b) parrot
3) prop root	c) sucking roots
4) frugivore	d) lizard

- i) 1-d , 2-a, 3- c, 4-b
- ii) 1-c, 2-b , 3-d, 4-a
- iii) 1- b, 2-a, 3-d, 4-c
- iv) 1-c, 2-d, 3-a, 4-b

**Q13. The point on stem from where a leaf or branch arises**

- i) Petiole
- ii) pedicel
- iii) node
- iv) internode

Q14. The type of reflection shown in the below given figure is

- i) Regular                      ii) irregular                      iii) lustrous                      ii) diffused

Q15. The one thing that is incorrect about shadows is:

- i) Shadows are black in colour
- ii) Shadow formation requires a screen
- iii) Shadow formation does not require a source of light
- iv) Shadows can be of different shapes and sizes

Q16. The property of light shown in the following picture is

- i) Circular propagation of light                      c) Rectilinear propagation of light  
ii) Rotational propagation of light                      d) Revolutionary propagation of light

(Q17 to Q20 are Assertion Reason type questions. Choose the correct option for each)  
The options are:

- a. Both Assertion and Reason are true and the Reason is the correct explanation of the Assertion.
- b. Both Assertion and Reason are true but Reason is not the correct explanation of the Assertion.
- c. Assertion is true but the Reason is false.
- d. Assertion is false but the Reason is true.

Q17. Assertion (A): The march past of soldiers in a parade is a rectilinear motion.

Reason (R): Rectilinear motion is the motion in a straight line.

Q18. Assertion (A): Parasitic roots of the banyan tree help it to stand erect.

Reason (R): The roots of banyan trees are aerial.

Q19. Assertion (A): We close our eyes when an object is suddenly thrown in our direction.

Reason (R): All living things respond to external stimuli.

### SECTION B (2 MARKS)

Q20. Ramesh saw his grandfather sprinkling water in front of his house on a hot summer afternoon.

- State the reason for his grandfather's action. Also, name the process involved here.
- Define the above process.

Q21. The rate of diffusion of liquids into liquids and gases into gases varies from each other. Justify.

Q22. Distinguish between Periodic and Non- Periodic motion. Give one example for each type of motion.

Q23. List four characteristics of living organisms.

Q24. Describe any 2 leaf modifications with suitable examples for each modified leaf.

Q25. Three torches A, B and C as shown in figure given below are switched ON one by one . The light from which of the torches will not form a shadow of the ball on the screen? Why?

### SECTION C (3 MARKS)

Q26. Give reason :

- camels can live without water for many days
- decomposition of dead organisms is useful
- few plants are able to survive in deep waters

Q27. How can you distinguish between the following pairs of substances?

- a wooden cork and a piece of Iron
- a glass window pane and a thick plastic door
- chalk powder and sugar

Q28. Mention the method of separation that can be used for the following mixtures:

- mustard oil and water
- cream from milk
- pebbles from rice
- grains from wheat stalks
- insoluble heavy impurities from the river water
- iron objects from garbage in junkyard

Q29. i) The distance between Aditi's home and Devika's home is 155 Kilometres. Calculate this distance in metres.

- ii) A meter scale is broken between the length 2 cm and 3 cm.
- (a) The length of a line segment measured by keeping its one end at 4 cm is found to be 12.8 cm. Find the actual length of the line segment.
  - (b) List any one precaution to be taken while measuring any given length using a scale/ruler

Q30. Classify plants on the basis of their habitat.

OR

Classify animals on the basis of their backbone

Q31. A) Jagrit is standing at a distance of 5m in front of a plane mirror. He moves 2m towards the plane mirror. Calculate the total distance between Jagrit and his image in the plane mirror. Will his image appear on a screen placed between him and the plane mirror?

B) Draw a well labelled diagram of Lunar Eclipse.

#### SECTION D (5 MARKS)

- Q32. a) Draw a Food Chain with minimum four organisms .
- b) Depict a block diagram to show the relationship between Biotic and Abiotic components of environment.
  - c) What is rainwater harvesting? Suggest one method of saving water in your homes.

Q33. Aakash mixed camphor, sand and iron filings by mistake. He wants to separate all the components.

- (a) Which component of the above mixture can be separated using a bar magnet? What is this method called?
- (b) How can the method of sublimation be used to separate the components of the above mixture? Explain the process with the help of a well labeled diagram.

Q34.a) Describe an activity to show that stem transports water and minerals to the plant.

- b) Define Pollination
- c) List two functions of a fruit.

OR

(a) As a part of Science activity, Avi put a bunch of white roses in the vase containing red coloured water. After 4-5 days, he observed the same.

- (i) What would be Avi's observations after 4-5 days?
- (ii) What does this observation indicate?
- (iii) How does a stem respond to gravity and light?

(b) Highlight the significance of following stem modifications:

- i) Tendrils
- ii) fleshy and green stem of cactus

**SECTION E (4 MARKS)**

**Answer any four questions in each case study.**

**Q35. Atharv, a performer, creates a variety of fascinating figures of birds, animals, monuments, personalities, etc. by moving and positioning his fingers in front of a white screen. The audience was mesmerized by his talent.**

- i) Name the phenomena of light that the audience experiences on the screen during the talent show by Atharv.**
- ii) Along with the screen where the fascinating figures can be observed, Atharv required two more things for the display. Name these two other essential things.**
- iii) What shall be the colour of the figures on the screen?**
- iv) What difference would occur if Atharv replaced the screen with a plane mirror?**
- v) Suggest one example where this phenomenon can be observed in nature on celestial bodies.**

**Q36. Rohan and his sister Priya were playing in their room. Suddenly they got distracted by the aroma of vegetable pulao that their mother was cooking in the kitchen. They both ran towards the kitchen to eat their favourite pulao.**

- i) Name the process through which the aroma reaches from one place to another.**
- ii) Define the process.**
- iii) What causes the movement of particles from one place to another as shown above?**
- iv) Give one more real life example of the above process.**
- v) Name the state of matter in which the rate of the above process is maximum.**

**Q37. The plants that grow in the desert need very small amounts of water for their survival. They have long roots and bear thin and spiny leaves.**

- i) Name the type of plants that grow in deserts.**
- ii) Why do such plants have long roots?**
- iii) State the reason behind their thin and spiny leaves.**
- iv) Give two examples of such plants.**
- v) Lotus cannot grow in the desert. Justify the statement**

**Q38. Rohan writes his name on a piece of paper and gets puzzled to see his name as he tried to read it while standing before a plane mirror.**

- a) Write the name of the phenomenon observed by Rohan in a plane mirror.**
- b) What should be the mirror image of the name 'ROHAN'?**
- c) Write any one real life situation where one can observe the same phenomenon.**
- d) List any two differences between an image formed by a plane mirror and a shadow.**

17	Option a	1
18	Option d	1
19	Option a	1
20	a)He sprinkled water to load the dust particles so that they do not float in air . The process is called loading b)speeding up the rate of sedimentation by making light , suspended particles heavier using suitable chemicals.	2
21	Rate of diffusion of liquids into liquids is slower than that of diffusion of gases into gases because particles in a liquid are not so free to move as they are in gases.	2
22	Periodic motion is the motion which repeats itself after regular interval of time. Eg motion of hands of a clock Non periodic motion which either does not repeat itself or does the repetitions in random irregular manner. Eg a ball rolled on floor	2
23	Living organisms are made up of cells They need food and water to grow They reproduce They have a definite life span	2
24	Leaf spine in cactus – the leaves are reduced to spines to prevent loss of water from the plant and protect the plant from grazing animals Leaf modified for reproduction- the leaves have buds which develop into a new plant	2
25	The light from torch C will not form a shadow because there is no screen placed in front of ball kept near torch C	2
26	i)camels do not have sweat glands which helps in reducing the loss of water from their body. So they can live without water for many days ii) decomposition of dead organisms converts dead and decaying matter into minerals which mixes with the soil and is helpful for plant growth. Also decomposition helps in cleaning the environment and makes space for other living organisms. iii)the amount of light reaching the plants decreases with increase in depth of water. So, few plants are able to survive in deep waters	3

27	i)wooden cork –floats, iron piece – sinks ii)glass window pane –transparent, thick plastic door- opaque iii)chalk powder – insoluble, sugar - soluble	3
28	a)separating funnel method      d) threshing b)centrifugation                      e)sedimentation and decantation c)handpicking                          f)magnetic separation	3
29	i)155 x 1000 m = 155000 m ii) a) initial reading= 4cm final reading = 12.8 cm Actual reading = 12.8cm -4cm = 8.8 cm b) the zero mark of the scale should coincide with one end of the length to be measured	3
30	Plant classification on the basis of habitat Mesophytes – such plants grow on land and need moderate amount of water for their growth. They have medium sized roots eg mango tree Xerophytes – they grow in deserts , have long roots and need very small amount of water eg cactus Hydrophytes- need maximum amount of water and grow in water. They have small or no roots eg water lily  OR  Animals are classified as Vertebrates and invertebrates on the basis of their backbone (for details refer pg 114 )	3
31	A) 6m , No his image will not appear on a screen placed between him and the plane mirror B) Lunar eclipse diagram on pg 193	1+2
32	a) Any one food chain of four organisms b) Block diagram to show relationship between biotic and abiotic components on pg 10 c) The collection and storage of rainwater for future use is called rainwater harvesting. We can save water in our homes by repairing the leaked taps	1+2+2
33	a)iron fillings , method is magnetic separation b)camphor can be separated by sublimation method diagram on pg 55 (sublimation method)	2+3
34	a)activity 4 on pg 128 b)the transfer of pollen grains from anther to stigma c)fruit is the edible part of a flower, fruits help in seed dispersal OR  a)i) the coloured water has transported to all parts of rose plant ii)it indicates that stem transports water and minerals to all plant parts ii)stem always grows towards light and away from gravity  b) i)stem tendrils help provide support to plants ii) fleshy green stem in cactus manufactures food	2+1+2
35	i)shadow formation ii) light source and opaque objects iii)black iv) instead of shadow images of his fingers will form on the plane mirror v)solar and lunar eclipse (any 4 to be answered )	4
36	i)diffusion ii)the property of mixing of particles of two materials on their own is called diffusion iii)the heat energy provided to food while cooking causes movement of particles iv)fragrance of agarbatti (incense stick) when lighted up spreads in the room	4

	<b>v)rate of diffusion is fastest in gas</b>

**Section-A**

**(16 Marks)**

**Q.1 In the question given below, there are two statements marked as Assertion (A) and Reason (R). Read the statements and choose the correct option.**

**Assertion: India has opted for Representative Democracy.**

**Reasoning: It is difficult to devise a method for direct participation in India owing to its large population.**

- (a). Both A and R are true and R is the correct explanation of A.**
- (b). Both A and R are true but R is not the correct explanation of A.**
- (c). A is true but R is wrong.**

(d). A is wrong and R is true.

**Q.2 Complete the analogy.**

**Green Revolution: grains :: Blue Revolution: \_\_\_\_\_**

- (a) Milk
- (b) Oil seeds
- (c) Fish
- (d) Lentils

**Q.3 On 23rd September, mid day sun is overhead at-**

- (a) Equator
- (b) Tropic of cancer
- (c) Tropic of capricorn

- (d) B,2,ii and A,1,i

**Q.8 In the question given below, there are two statements marked as Assertion (A) and Reason (R). Read the statements and choose the correct option.**

**Assertion (A): Excavations of Indus Valley proved that it was an urban civilisation.**

**Reason (R): A dockyard was discovered in Lothal, Gujarat.**

- (a). Both A and R are true and R is the correct explanation of A.
- (b). Both A and R are true but R is not the correct explanation of A.
- (c). A is true but R is wrong.
- (d). A is wrong and R is true.

**Q.9 Select the Odd one out.**

- (a) Pongal
- (b) Diwali
- (c) Onam
- (d) Baisakhi

**Q.10 Suppose you want to see sites of Indus Valley Civilisation in India. Which of the following states are you going to visit?**

- (a) Karnataka, Kerala, Goa
- (b) Punjab, Rajasthan, Gujarat
- (c) Sikkim, Arunachal Pradesh, Manipur
- (d) West Bengal, Mizoram, Tripura

**Q.11 While going to school Raghav asked his parents why the people were coming to the place where they live, as they see a lot of them coming and settling in the city where they live.**

**What reason would Raghav's parents give?**

- (a) Good roads
- (b) Job opportunities
- (c) Shopping malls
- (d) Cinema halls
