Q.9. High light five differences between traditional and modern methods of farming based on the factors given.

Factors ↓	Traditional Methods	Modern Methods
Seeds		
Irrigation		
Fertilisers		
Method of ploughing		
Labour		

Q.10. Read the source given below and answer the questions that follow:

In the future, one would like to see more non-farm production activities in the village. Unlike farming, non-farm activities require little land. People with some amount of capital can set up non-farm activities. How does one obtain this capital? One can either use his own savings, but more often has to take a loan. It is important that loan be available at low rate of interest so that even people without savings can start some non-farm activity. Another thing which is essential for expansion of non-farm activities is to have markets where the goods and services produced can be sold. In Palampur, we saw the neighbouring villages, towns and cities provide the markets for milk, jaggery, wheat, etc. As more villages get connected to towns and cities through good roads, transport and telephone, it is possible that the opportunities for non-farm activities in the village would increase in the coming years.

- a. According to you, what may be the reason for preferring non-farm activities by the people of the village in future?
- b. How can a loan with low rate of interest help people to start non-farm activity?
- c. Which are the markets for milk, jiggery and wheat that are produced in Palampur?
