A. ঝড় কখনও একা আসেনা। সে সঙ্গে করে নিয়ে আসে তাণ্ডবতাকে। রুদ্রমূর্তি তার সাথী। সন্ধ্যা থেকেই আকাশটা ছিল থমথমে। সঙ্গে গুমোট ভাব বাতাসে। তার আগেই টেলিভিশনের খবরে জানা গেল আজ বঙ্গোপসাগরে এক বিশাল ঘূর্ণিঝড় সৃষ্টি হয়েছে। স্থান পুরীর সমুদ্র উপকূল। কিছুক্ষণের মধ্যেই তা আছড়ে পড়বে গাঙ্গেয় পশ্চিমবঙ্গে। সঙ্গে বইবে ৮০-১০০ (আশি থেকে একশ) কিমি. বেগে ঝোড়ো হাওয়া। সবেমাত্র খবরটি শেষ হয়েছে। আর মুহূর্তের মধ্যে ঝড়ের তাণ্ডব শুরু হয়ে গেল। আর আকাশের এ প্রান্ত থেকে অপর প্রান্ত পর্যন্ত বিদ্যুতের ঝলকানি আর ঝলকানি। হঠাৎ হঠাৎ দমকা বাতাসে দরজা জানালা দুমদাম শব্দে বন্ধ হতে লাগল। মনে হচ্ছে সব কিছু মুহূর্তের মধ্যে উড়িয়ে নিয়ে যাবে। স্থির থাকা যাচ্ছে না। চারিদিকে সব লগুভগু হয়ে যাচ্ছে। হঠাৎ বিদ্যুৎ চলে গেল। ঝড়ের রুদ্রমূর্তি নিজের চোখে দেখার অভিজ্ঞতা অনেকেরই হয় না। ঝড়ের তাণ্ডব দেখতে দেখতে নজরুল ইসলামের ‘বিদ্রোহী’ আবার কখনও বঙ্কিমচন্দ্রের কমলাকান্তের কথা মনে আসছে বারবার। কারণ বঙ্কিমচন্দ্র এবং নজরুল উভয়েই সৃষ্টি ও ধ্বংসকে উপলব্ধি করেছিলেন পাশাপাশি। অনুভব করেছি জীবন-মৃত্যুর মধ্য দিয়েই বোধ হয় সৃষ্টির প্রবাহ গতিশীল। পৃথিবীর যত জঞ্জাল মুছে যাক। আসুক নতুন পর্যায়।

C. শিবু যেদিন প্রথম ইস্কুলে এসে ভর্তি হলো, কে এত কথা ভাবতে পেরেছিল ? দেখতে ছোটো, রোগা, ময়লা, মাথার চুল কদম ফুলের মত ছাঁটা, টিলে পাজামার ওপর জিনের কোট চাপানো পায়ে নোংরা নাগরা। ওকে দেখে বিরিঞ্চি এ্যান্ড কোম্পানী তো হেসেই বাঁচে না। বিরিঞ্চি দেখতে সুন্দর, বড়লোকের ছেলে তার উপর থ্রি থেকে বরাবর ফাস্ট হয়ে আসছে। কিন্তু কোনো দেমাক নেই; তাই সে-ই প্রথম গায়ে পড়ে আলাপ করল শিবুর সঙ্গে।

শিবুর বাবা চাকরি করেন কোন এক পল্টনে.... সেখানেই শিবুর জন্ম এবং তেরো বছর যাপন। ফলে সে বাংলাটা বলে ভাঙা ভাঙা, কিন্তু তার মুখে ইংরেজির খই ফোটে। বিরিঞ্চির বিশুদ্ধ বঙ্গ ভাষা শিবু যতটা বুঝতে পেরেছিল, শিবুর সাহেবি ঘেঁষা ইংরেজি বিরিঞ্চি বুঝেছিল তার চেয়ে ঢের কম। শনিবার থার্ড পিরিয়ডে ইংরাজী মাস্টারমশায় ক্লাসে নতুন মুখ দেখে শিবুর নাম জিজ্ঞাসা করলেন, শিবু উঠে দাঁড়িয়ে গম্ভীরভাবে বললে, 'বিদা রায়'।

অমনি সবাই হো হো করে হেসে উঠলো। যাক সেদিনকার মত ব্যাপারটা সেখানেই মিটলো। বিরিঞ্চি মনে মনে একটু খুশি হলো। এক সপ্তাহ ঠিকঠাক চললো। কিন্তু শিবু একটুও ঘাবড়ালো না। পরের শনিবার ইংরাজী ক্লাসে শিবু তুখড় ইংরাজীতে স্যারকে বললো, 'কথাটা কাপ বোর্ড নয় স্যার ওটা কাবার্ড।'

এইবার মাস্টারমশায়ের কান ঝাঁ ঝাঁ করার পালা। রীতিমতো চোটে গিয়ে তিনি বললেন, “তোমার ভারি সাহস তো হে ছোকরা, আমার ভুল ধরতে আসো। রোসো মজা দেখাচ্ছি। তোমাকে আজ বেত না খাইয়েছি তো আমি চাকরিই ছেড়ে দেব।’ বলে রাগে গজ গজ করতে করতে ঘর থেকে বেরিয়ে গেলেন। ছেলেরা সব হতভম্ব, বিরিঞ্চিও বাস্তবিক দুঃখিত হয়েছিল।

SECTION A: READING (20 MARKS)

1. Read the following passage carefully and answer the questions:

(1X8=8)

1. Among the fundamental qualities that a citizen of a democracy must have is a deep concern for the good life of his fellow beings. He must have a sense of social responsibility and the will to sink his own immediate interests and the interests of his class for the common good. He must do his full share working for the community.

2. But these qualities alone might lead to the well-meaning dictator or the unthinking follower. The citizen of democracy must also be a man of independent judgement, he must respect the individualities of others and therefore, be tolerant of opinions in conflict with his own; he must prefer methods of discussion and persuasion to methods of force.

3. The citizen of democracy also needs certain intellectual qualities. It is not enough to love truth; he must learn how to find it. It is easy to teach students to reason correctly in the physical sciences; it is much more difficult to reason correctly in the social sciences where their own prejudices and passions are involved. They must be taught habits of clear thinking in order to acquire the power of recognizing their own prejudices and of discussing political and economic questions with the same calm, the same desire to understand the other person's position.

4. A striking example of the effective working of the right kind of public opinion is given by the history of the housing of the working classes. One hundred years ago, public opinion used to be indifferent. Gradually, under the pressure of public opinion, governments began to intervene and improve the standard of housing. Since the First World War, from the days of 'Homes for Heroes' campaign, public opinion has insistently demanded the abolition of the slums and the rapid building of new houses until a good house is provided for every family. Housing has become the front page news in the press. As a result, every government has taken action to provide affordable housing, some in one way, some in another.

(1X12=12)

1. Education, tackled by UN's Sustainable Development Goal 4, highlights the need to ensure free, equitable and quality primary and secondary education for all children. While the goal of achieving universal primary education is within reach for many countries throughout the world, a more thorough analysis reveals something rather different.

2. According to the new UNICEF Education Pathway Analysis, 92% of children globally have entered primary school, but only 78% made the transition to lower secondary school. Reasons included dropout, repetition and non-transition. From this number, only 57% complete lower secondary school by the age of 15 to 17--- an age in which they are supposed to be in upper secondary school, and 53% transition to upper secondary school. As for others, 17% are still attending lower secondary, being above age for that grade and 4% dropout of lower secondary school. Thus, many children fail to complete the upper secondary level in the appropriate time, putting them at risk of dropping out. Even worse, some drop out before finishing.

3. The educational pathway data also calculates education efficiency rate, which represents the share of children who transition to upper secondary school at the age expected for that grade, divided by the share of children who enter primary school. Globally, this rate is 58%, but there

are stark regional disparities. For example, African countries have education efficiency rates below 40%, while in Latin America and Asia, the rates are typically 60% or above.

4. But a larger question faced by most countries is one of educational competency. As outlined by SDG 4, access to education is not enough. The quality of the education given and the learning competencies of the student must also align with global trends. The National Achievement Survey 2021 undertaken by the Government of India focused primarily on this aspect. It evaluated the competency of different levels of students across classes (3, 5, 8 and 10) and subjects (Language, Social Studies, Mathematics and Science) based on their ability to analyse, reason and communicate ideas.

5. The NAS 2021 found that the competency scores for various subjects in different classes ranged between a minimum of 41% and a maximum of 65%. However, the competency scores gradually decreased in the higher classes. It ranged between 61% and 65% in class 3, but reduced to the 57%-62% range in class 5 and 41%-55% in class 10. A major finding was that the average competency score of girls was generally higher than that of boys. Although the competency scores of boys and girls in Science and Mathematics were equal in class 8, the boys scored marginally higher in Mathematics in class 10, while the girls scored higher in Science.

मानव जाति को अन्य जीवधारियों से अलग कर महत्त्व प्रदान करने वाला जो एकमात्र गुरु है, वह है उसकी विचार-शक्ति। मनुष्य के पास बुद्धि है, विवेक है, तर्कशक्ति है अर्थात् उसके पास विचारों की अमूल्य पूँजी है। अपने सुविचारों की नींव पर ही आज मानव ने अपनी श्रेष्ठता की स्थापना की है और मानव-सभ्यता का विशाल महल खड़ा किया है। यही कारण है कि विचारशील मनुष्य के पास जब सुविचारों का अभाव रहता है तो उसका वह शून्य मानस कुविचारों से ग्रस्त होकर एक प्रकार से शैतान के वशीभूत हो जाता है। मानवी बुद्धि जब सद्भावों से प्रेरित होकर कल्याणकारी योजनाओं में प्रवृत्त रहती है तो उसकी सज्जनता का कोई अंत नहीं होता, किंतु जब वहाँ कुविचार अपना घर बना लेते हैं तो उसकी पाशविक प्रवृत्तियाँ उस पर हावी हो उठती हैं। हिंसा और पापाचार का दानवी साम्राज्य इस बात का द्योतक है कि मानव की विचार-शक्ति, जो उसे पशु बनने से रोकती है, उसका साथ देती है।

हमारे जीवन में उत्साह का विशेष स्थान है। किसी काम को करने के लिए सदा तैयार रहना तथा उस काम को करने में आनंद अनुभव करना उत्साह का मुख्य लक्षण है। उत्साह कई प्रकार का होता है, परंतु सच्चा उत्साह वही होता है जो मनुष्य को कार्य करने के लिए प्रेरणा देता है। मनुष्य किसी भी कारणवश जब किसी के कष्ट को दूर करने का संकल्प करता है, तब जिस सुख को वह अनुभव करता है वह सुख विशेष रूप से प्रेरणा देने वाला होता है। इसी उत्साह के लिए कवियों ने कहा है कि 'साहस से भरी हुई उमंग ही उत्साह है।' जिस भी कार्य को करने के लिए मनुष्य में कष्ट, दुःख या हानि को सहन करने की ताकत आती है, उन सब से उत्पन्न आनंद ही उत्साह कहलाता है। उदाहरण के लिए दान देने वाला व्यक्ति निश्चय ही अपने भीतर एक विशेष साहस रखता है और वह है धन-त्याग का साहस। यही त्याग यदि मनुष्य प्रसन्नता के साथ करता है तो उसे उत्साह से किया गया दान कहा जाएगा। इसी प्रकार युद्ध-क्षेत्र में वीरता दिखाने वाले तथा दया के लिए वीरता दिखाने वाले भी अपने-अपने क्षेत्र में उत्साह का कार्य करने वाले हैं। उत्साह अच्छे गुणों में गिना जाता है। उचित कार्य के लिए किया गया उत्साह शुभ और सुंदर होता है, पर न करने योग्य कार्यों के प्रति वही उत्साह प्रशंसनीय नहीं लगता। उत्साह आनंदप्रधान भी होता है। उदाहरण के लिए हमें अपने किसी मित्र के आने का समाचार प्राप्त होता है। एक स्थिति तो यह है कि उस समाचार को सुनकर हम बैठे ही रहें और केवल मुसकराहट भर दें। एक स्थिति वह भी होती है जब समाचार सुनकर हम दौड़ कर आगे जाएँ।

(घ) विशेष साहस से किसी कार्य को अधूरा छोड़ना।

(ii) कथन (A) और कारण (R) को पढ़कर सर्वाधिक उपयुक्त विकल्प का चयन कर लिखिए-

कथन (A) : उत्साह की गणना अच्छे गुणों में की जाती है। (1)

कारण (R) : अच्छे कर्मों के लिए किया गया उत्साह बहुत ही शुभ और सुंदर होता है।

(क) कथन (A) तथा कारण (R) दोनों गलत हैं।

(ख) कथन (A) गलत है परन्तु कारण (R) सही है।

(ग) कथन (A) सही है तथा कारण (R) उसकी सही व्याख्या करता है।

(घ) कथन (A) तथा कारण (R) दोनों सही हैं, किंतु कारण (R) कथन (A) की सही व्याख्या नहीं करता है।

चरित्र-निर्माण में माता-पिता, गुरुजन, संगति एवं वातावरण के प्रभाव को भी नकारा नहीं जा सकता। सुदृढ़ चरित्र के अभाव में व्यक्ति मौजूदा समाज में व्याप्त हिंसा, द्वेष, घृणा, भ्रष्टाचार, कलह, धोखाधड़ी, दुराचार आदि असामाजिक प्रवृत्तियों का शिकार हो जाता है और समाज में भी सम्मानित स्थान प्राप्त नहीं कर पाता।

बातचीत में अधरों पर छाई निश्छल स्वाभाविक मधुर मुसकान किस को आकृष्ट नहीं करती? बातचीत में मुसकराहट यदि एक ओर प्रसन्नता, सद्भावना और मैत्री बढ़ाती है तो दूसरी ओर परेशान, उद्विग्न और उदास लोगों के लिए राहत और भग्नाश जनों के लिए प्रेरणास्त्रोत सिद्ध होती है। पुष्प की गंध की तरह मुसकराहट सबको सुवासित कर देती है। सरल हृदय से ही स्वाभाविक मुसकराहट प्रस्फुटित होती है जो मनुष्य के हृदय की निर्मलता और प्रेम का प्रतीक होती है। कपट, स्वार्थ और गुरुता और हीनता की भावना से ग्रस्त कुटिलतापूर्ण मुसकराहट बनावटी होती है जो बातचीत की रोचकता को समाप्त कर देती है। मुसकराहट का अक्षय कोष लुटाने वाले गरीब नहीं होते। उनके तो दोनों हाथों में लड्डू होते हैं-जाता कुछ नहीं, मिलता बहुत कुछ है।

37. Coal is one of the fuels used to cook food. Earlier, it was used in railway engines to produce steam to run the engine. Coal is also used as a fuel in various industries. About 300 million years ago the earth had dense forests in low lying wetland areas. Due to natural processes, like flooding, these forests got buried under the soil. As more soil deposited over them, they were compressed. The temperature also rose as they sank deeper and deeper. Under high pressure and high temperature, dead plants got slowly converted to coal. Since it was formed from the remains of vegetation, coal is also called a fossil fuel. 4

Whenever you fall ill the doctor may give you some antibiotic tablets, capsules or injections. The source of these medicines is microorganisms. Streptomycin, tetracycline and erythromycin are some of the commonly known antibiotics which are made from fungi and bacteria. In 1929, Alexander Fleming was working on a culture of disease-causing bacteria. Suddenly he found the spores of a little green mould in one of his culture plates. He observed that the presence of mould prevented the growth of bacteria. In fact, it also killed many of these bacteria. From this the mould penicillin was prepared. When a disease-carrying microbe enters our body, the body produces antibodies to fight the invader. If dead or weakened microbes are introduced into a healthy body, the body fights and kills the invading bacteria by producing suitable antibodies. The antibodies remain in the body and we are protected from the disease-causing microbes forever. Several diseases, including cholera, tuberculosis, smallpox and hepatitis can be prevented by vaccination. Edward Jenner discovered the vaccine for small- pox in 1798. In your childhood, you must have been given injections to protect yourself against several diseases.
